

Preschool Guided Programs

45 minutes to 1 hour - \$2.00

Neat Feet & Beaks

Can you tell where a bird lives or what it eats by its feet and beak? Animals have special characteristics that help them live in different habitats (all seasons).

Happy Habitat Homes

Let your imagination soar as you journey on a magical marsh tour with special puppets to explore their habitat (all seasons).

Who's Who-oooo

Owls are fascinating and beautiful birds that are important predators in the food chain. Come hear their different calls and discover what they eat (all seasons).

Rain or Shine

Discover the wonders of weather. Find out how weather can change and how it can affect us (all seasons).

Itsy-Bitsy Spider

How does a spider spin its web? Find out interesting facts about spiders and create your own spider web (all seasons).

Snakes Alive!

Put those scary snake tales to rest and learn all about these fascinating creatures (all seasons).

Beavers & Muskrats

Explore the life of these two amazing mammals and learn about the adaptations that make them so unique (all seasons).

Water Bugs

Explore underwater life by catching critters, then use magnifiers to identify your water bugs! Fill your bug jar with super critter stamps (May - September).

Bird's Nest

Spring is a time for birds to begin building their nests. What materials do they use? Make your own special treat to help the birds (April - August).

Let's Feed the Birds

What's dinner for the birds? Come create your own special feeder and give it as a gift to the birds at Oak Hammock (September - March).

Plants & Seeds

Why are plants so important to birds, mammals and people? Find out how plants change through the seasons (March - November). 30-45 minutes in length.
